

The Future of Surgical Sponges is Here

Safer, more absorbent & more affordable than gauze.

High Performance Advancea Nonwoven Surgical Sponges & Wound Dressings

Advancea™ Nonwoven Products Catalog

Dear Customers,

Thank you for browsing our catalog for the high performance Advancea™ surgical sponges and wound dressings, which are made with our patented rayon based spunlace nonwoven materials and processes. In addition to the products included in the catalog, we can also provide custom-make Advancea™ products to suit your special requirements.

Unlike the traditional gauze (and the general purpose nonwoven in the market today), our Advancea™ surgical sponges and wound dressings have high structural strength and a soft feel, superior absorbency, free of lint and loose threads. Further, we have recently developed and patented a new class of Advancea™ nonwoven Surgi-Viz™ lap sponges with multi-colored safety retrieval handles that are very visible, easy-to-retrieve and most importantly – easier to account for, after surgery.

In summary, all our Advancea™ nonwoven surgical sponges and wound dressings have the following advantages over the existing products in the market:

- Improved safety
- Higher absorbency and wicking speed
- More eco-friendly
- More cost effective

Yours Sincerely

Management Team,
Strata Medical

STRATA MEDICAL
