

# The Future of Surgical Sponges is Here

Safer, more absorbent & more affordable than gauze.

Advancea™ Nonwoven Surgi-Viz™ Lap Sponges  
Sterile Lap Sponge Pack (5's) with Multi-Color Retrieval Handles.

## Safety Advantages vs. Gauze Lap Sponges

The unique colored handles on each sponge will increase the accuracy of counting before and after surgery.

The Surgi-Viz™ sponge handle is engineered to be obvious for easy retrieval after surgery.

Surgi-Viz (left)  
Gauze (right)

The larger Surgi-Viz™ sponge reduces the odds of a sponge being overlooked when in the patient.

Surgi-Viz (left)  
Gauze (right)

Surgi-Viz™ absorb more blood than gauze sponges, thus requiring fewer sponges for surgeries and lowering the odds of sponges left in patients.

## More ways that Surgi-Viz™ performs better than gauze sponges & their safety systems

- Superior properties: Faster wicking speed and higher absorbency.
- Less likely to cause infection: No lint and loose threads from edges.
- Less costly than systems requiring chips/bar code and monitors.
